

TOKEN SALE BRIEF

EHX litepaper

The utility token of Eterna, a live hybrid exchange. This short brief covers the official OTC sale on app.eterna.exchange.

OTC PRICE

0.00392 USDT per EHX

Pay USDT on Ethereum. Delivery to the connected wallet. No vesting on this sale.

ASSET EHX · ERC-20 · Ethereum	YOU PAY USDT on Ethereum
PAGE CAP 1,000 USDT per wallet in the UI	OFFICIAL URL app.eterna.exchange/tokensale

HOW TO BUY

- 1 Connect a wallet**
One that can hold USDT and EHX on Ethereum.
- 2 Switch to Ethereum**
The OTC contract runs on mainnet only.
- 3 Enter a USDT amount**
Up to 1,000 USDT on this page. The contract does not enforce that cap.
- 4 Confirm in the wallet**
Approve USDT once, then sign. Keep the receipt and Etherscan link.

Not financial advice. Not an offer in restricted jurisdictions. Verify contract addresses on Etherscan before you sign.

01 What EHX is

EHX (Eterna) is an ERC-20 token on Ethereum. It is the utility token of Eterna, a live hybrid perpetual-futures exchange with copy trading, quests, staking, and an AI/MCP trading surface. The product is already live. This document does not pitch a whitepaper-only network.

02 This sale

This is an OTC sale on the official Eterna app. You pay USDT on Ethereum. Filled orders deliver EHX to the connected wallet. There is no vesting on this sale.

Price	0.00392 USDT per EHX
You pay	USDT on Ethereum (ERC-20)
You receive	EHX to the connected wallet
Wallet cap on this page	1,000 USDT in the interface only
Contract cap	The OTC contract does not enforce the page cap
Vesting	None on this sale
Settlement	On-chain when a matching sell order fills

03 How fills work

There is no countdown and no fake scarcity. If sell liquidity is available, EHX arrives in the connected wallet after the transaction confirms. If not, your USDT buy order remains in the OTC contract until a matching sell appears or you cancel. Always keep the transaction hash from the in-app receipt.

Sale proceeds support marketing and launch of the live exchange. This brief does not publish a raise target.

04 On-chain facts

Taken from Ethereum mainnet and the live Eterna app. FDV is arithmetic at the OTC price, not a target or a forecast. Holder counts are omitted because they go stale.

TOKEN Eterna (EHX), ERC-20	CURRENT TOTAL SUPPLY 2,334,773,295.57 EHX
TOKEN CONTRACT 0x65cA08479274387b6179D239fd93BbC424982a55	
OTC EXCHANGE 0xdd996B6cC115198D5662B4160906db7e0866e616	
USDT 0xdAC17F958D2ee523a2206206994597C13D831ec7	
ILLUSTRATIVE FDV AT 0.00392 About \$9.15 million. Arithmetic only, not a target.	

05 Utility

- Trading-fee cashback at the published launch rate in the Eterna app.
- Staking and holder tools, including chart signals gated to EHX holders.
- Eterna AI and MCP are exchange infrastructure for agents. That is not a claim that the token pays model inference.
- The hybrid exchange is already live: perps, copy trading, quests, staking.

06 DEX listing

A public DEX listing is planned after this OTC window. Liquidity pool sizes, fees, and dates will be published when those pools exist on-chain. This brief does not quote unpublished pool numbers and does not promise a listing price or market cap.

07 Risks

EHX can lose value. Smart contracts can fail. OTC fills depend on available sell liquidity. Access may be unavailable in restricted jurisdictions. This document is not financial, legal, or tax advice and is not an offer to the public in restricted jurisdictions. Cryptocurrency is volatile. Do your own research and follow local law.

BEFORE YOU SIGN

Use only <https://app.eterna.exchange/tokensale>. Check the EHX token and OTC contract addresses against Etherscan. Do not trust screenshots, DMs, or lookalike domains.

08 Still open

Team allocation, mint policy, team vesting, CEX listings, and a token-contract audit are not claimed here. They will be published when they are confirmed. The OTC exchange contract lives in the Eterna repository; that is not the same as a completed token audit.

Buy EHX on the official Eterna app
